Please reject (NAB) petition 04-160. I have the right to stay informed about other cities traffic and weather provided to me by my XM satellite radio subscription service. Not only does this keep me informed, helping with my travel information, it's entertaining to me to listen to the traffic and weather conditions of my boyhood home city of Chicago. Due to overbearing restrictions and limitations imposed on FM Broadcasting, I've been forced to alternative sources of entertainment. And now limitations are being petitioned for in this market as well. Please don't take away anymore of my freedoms.

Thank you
